TEL Strategy		
UniNettuno are working on enhancing the platform that comes from 20 years of research of psycho-pedagogic model of our Rector and her staff. They will work on implementing the activities on mobile through applications, and for the democratization of knowledge.		

OOFAT Model
Interpretation: The closer the line moves towards the centre, the more fixed and institution-specific the approach taken by the institution. The further from the centre, the more flexible and open the approach.

Business Model	
Entrepreneurial model with fixed core	
Defender-related characteristics versus Prospector-related characteristics	
Networks	Profitability / sustainability
	Competitive advantage
	Value chain
	Communication channels
Target group	Products / services
Business Model: Additional Information	
The business model focuses on using digital technologies to reach existing markets via non-traditional channels using new or innovative products and services.	

UFAI Model: Additional Information
Content Some degree of content personalisation. All contents are produced by highly qualified professors.
Delivery High level of flexibility for individual learners. Support provided by professors/tutors. Access to learning contents of bachelor course or master's degree only for enrolled students. Free access to certain courses upon registration. Didactic contents are always available on the platform 24h; the online tutoring who will support the activity of a specific group of students is scheduled in fixed periods of the year.
Recognition UniNettuno shared the academic year in period of study and period for assessments that is centrally dictated; but UniNettuno model includes a lot of Technological Poles around the world, and this means a high flexibility for students to organize the final assessments. All the exams will be taken in all the Technological Poles in a specific period. All study plans and related pathways are outlined on our platform, following the Italian law.
